EMP

Energon Management Protocol

EnergonCube

Max Supply: 1,000,000

One Wallet • One Cube • One Guardian

Energon Controller

Deterministic Emission

EON Token (ERC-20)

Hard Cap: 30,000,000 EON

- 25 EON every 10 minutes
- +5 EON per NFT Minted
- Halving every 1,461 days

10-Minute Progression Window

Burn Path

25 EON

Genesis-bound burn

- Disabled after 1,461 days
- Eligibility enforced on-chain

Distribution Path

25 EON reward

Deterministic guardian selection

- Exactly 1 EnergonCube required
- 0 or 2+ cubes → no distribution

EMP Management Interface

- Protocol observation layer
- Deterministic state visibility

Deterministic protocol architecture

State over strategy • Observation over optimization
